Section D – Risks

D.2	Key risks that are specific to the Issuer:	<p>The Securities are general unsecured obligations of the Issuer. Investors in the Securities are exposed to the risk that the Issuer could become insolvent and fail to make the payments owing by it under the Securities.</p> <p>The profitability of the Issuer will be affected by, among other things, changes in global economic conditions, inflation, interest/exchange rates, capital risk, liquidity risk, market risk, credit risk, risks from estimates and valuations, risks relating to off-balance sheet entities, cross-border and foreign exchange risks, operational risks, legal and regulatory risks and competition risks.</p> <p>The Issuer is exposed to a variety of risks that could adversely affect its operations and/or financial condition:</p> <ul style="list-style-type: none"> • Liquidity risk: The Issuer's liquidity could be impaired if it were unable to access the capital markets or sell its assets, and the Issuer expects its liquidity costs to increase. If the Issuer is unable to raise funds or sell its assets, or has to sell its assets at depressed prices, this may adversely affect its financial condition. The Issuer's businesses rely significantly on its deposit base for funding; however, if deposits cease to be a stable source of funding, the Issuer's liquidity position may be adversely affected and it may be unable to meet its liabilities or fund new investments. Changes to the Issuer's credit ratings may also adversely affect the Issuer's business. • Market risk: The Issuer may incur significant losses on its trading and investment activities due to market fluctuations and volatility in financial and other markets. Its businesses are subject to the risk of loss from adverse market conditions and unfavourable economic, monetary, political, legal and other developments in the countries it operates in around the world. The Issuer's real estate-related businesses may continue to be adversely affected by any downturn in real estate markets and the economy as a whole. The Issuer has significant risk concentration in the financial services industry which may cause it to suffer losses even when economic and market conditions are generally favourable for others in the industry. Further, the Issuer's hedging strategies may not be fully effective in mitigating its risk exposure in all market environments or against all types of risk. Market risk may also increase the other risks that the Issuer faces. • Credit risk: The Issuer may suffer significant losses from its credit exposures across a wide range of transactions. The Issuer's exposure to credit risk may be increased by adverse economic or market trends or increased volatility in the markets. The Issuer may be unable to sell its positions, which may increase its capital requirements, which could adversely affect its businesses. Defaults or concerns about a default by a large financial institution could also adversely affect the Issuer and financial markets generally. The information which the Issuer uses to manage its credit risk (such as the credit or trading risks
-----	---	---

		<p>of a counterparty) may also be inaccurate or incomplete.</p> <ul style="list-style-type: none"> • Risks from estimates and valuations: The Issuer makes estimates and valuations that affect its reported results; these estimates are based upon judgment and available information, and the actual results may differ materially from these estimates. To the extent the Issuer's models and processes become less predictive due to unforeseen market conditions, illiquidity or volatility, the Issuer's ability to make accurate estimates and valuations could be adversely affected. • Risks relating to off-balance sheet entities: The Issuer may enter into transactions with certain special purpose entities which are not consolidated and whose assets and liabilities are off-balance sheet. If the Issuer is required to consolidate a special purpose entity for any reason, this could have an adverse impact on the Issuer's operations and capital and leverage ratios. • Cross-border and currency exchange risk: Cross-border risks may increase the market and credit risks that the Issuer faces. Economic or political pressures in a country or region may adversely affect the ability of the Issuer's clients or counterparties in that country or region to perform their obligations to the Issuer, which may in turn have an adverse impact on the Issuer's operations. The Issuer has businesses in emerging markets and economic and financial disruptions in these countries may adversely affect its businesses. A substantial portion of the Issuer's assets and liabilities are denominated in currencies other than the Swiss franc and fluctuations in exchange rates may adversely affect the Issuer's results. • Operational risk: The Issuer is exposed to a wide variety of operational risks, including risks from errors made in execution or settlement of transactions or information technology risk due to dependencies on information technology and third party supplies. The Issuer may also suffer losses due to employee misconduct. • Risk management: The Issuer's risk management procedures and policies may not always be effective, and may not fully mitigate its risk exposure in all markets or against all types of risk. • Legal and regulatory risks: The Issuer faces significant legal risks in its businesses. The Issuer and its subsidiaries are subject to a number of legal proceedings, regulatory actions and investigations, where an adverse result could have a material adverse effect on the operations and results of the Issuer. Regulatory changes may adversely affect the Issuer's business and ability to execute its strategic plans. The Issuer (and the financial services industry) continue to be affected by significant uncertainty over the scope and content of regulatory reform. Under Swiss banking laws, FINMA has broad powers in the case of resolution proceedings with respect to a Swiss bank such as the Issuer, and such proceedings may adversely affect the Issuer's shareholders and creditors. Changes in monetary policies adopted by
--	--	---

		<p>relevant regulatory authorities and central banks may directly impact the Issuer's costs of funding, capital raising and investment activities, and may impact the value of financial instruments held by the Issuer and the competitive and operating environment for the financial services industry. Legal restrictions on the Issuer's clients may also adversely affect the Issuer by reducing the demand for the Issuer's services.</p> <ul style="list-style-type: none"> • Competition risks: The Issuer faces intense competition in all financial services markets and for the products and services it offers. The Issuer's competitive position could be harmed if its reputation is damaged due to any failure (or perceived failure) in its procedures and controls to address conflicts of interest, prevent employee misconduct, etc. The continued public focus on compensation in the financial services industry and related regulatory changes may adversely impact the Issuer's ability to attract and retain highly skilled employees. The Issuer also faces competition from new trading technologies which may adversely affect its revenues and businesses. • Risks relating to strategy: The Issuer may not achieve all of the expected benefits of its strategic initiatives. The Issuer has announced a program to change its legal entity structure; however, this is subject to uncertainty regarding feasibility, scope and timing. Legal and regulatory changes may require the Issuer to make further changes to its legal structure, and such changes may potentially increase operational, capital, funding and tax costs, as well as the Issuer's counterparties' credit risk.
D.6	<p>Key risks that are specific to the Securities and risk warning that investors may lose value of entire investment or part of it:</p>	<p>The Securities are subject to the following key risks:</p> <ul style="list-style-type: none"> • The market value of the Securities and the amount payable or deliverable at maturity depend on the performance of the underlying asset(s). The performance of an underlying asset may be subject to sudden and large unpredictable changes over time (known as "volatility"), which may be affected by national or international, financial, political, military or economic events or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. • If the redemption amount or settlement amount or any other amount payable under the Securities depends on the performance of the underlying asset(s) and is multiplied by a participation factor which is greater than 100 per cent., investors may participate disproportionately in the performance of the underlying asset(s). • A secondary market for the Securities may not develop and, if it does, it may not provide the investors with liquidity and may not continue for the life of the Securities. Illiquidity may have an adverse effect on the market value of the Securities. The price in the market for a Security may be less than its issue price or its offer price and may reflect a commission or a dealer discount, which would further

		<p>reduce the proceeds you would receive for your Securities.</p> <ul style="list-style-type: none"> • The market value of the Securities will be affected by many factors beyond the control of the Issuer (including, but not limited to, the creditworthiness of the Issuer, the interest rates and yield rates in the market, the volatility of the underlying asset(s) (if any), etc.). Some or all of these factors will influence the value of the Securities in the market. • The issue price or the offer price of the Securities may be more than the market value of such Securities as at the issue date, and more than the price at which the Securities can be sold in secondary market transactions. The issue price or the offer price of the Securities may take into account, where permitted by law, fees, commissions or other amounts relating to the issue, distribution and sale of the Securities, or the provision of introductory services, expenses incurred by the Issuer in creating, documenting and marketing the Securities and amounts relating to the hedging of its obligations under the Securities. • The levels and basis of taxation on the Securities and any reliefs from such taxation will depend on an investor's individual circumstances and could change at any time. The tax and regulatory characterisation of the Securities may change over the life of the Securities. This could have adverse consequences for investors. • In certain circumstances (for example, if the Issuer determines that its obligations under the Securities have become unlawful or illegal or following an event of default) the Securities may be redeemed prior to their scheduled maturity. In such circumstances, the Unscheduled Termination Amount payable may be less than the original purchase price and could be as low as zero. No other amounts shall be payable in respect of the Securities on account of interest or otherwise following such determination by the Issuer. • Following certain events affecting the Issuer's hedging arrangements and/or the underlying asset(s), the Issuer may redeem the Securities at the scheduled maturity by payment of the Unscheduled Termination Amount instead of the Redemption Amount. In such circumstances, the Unscheduled Termination Amount payable will be at least equal to the Minimum Payment Amount, but may be less than what the redemption amount or settlement amount would have been if such event had not occurred. • Following early redemption of Securities, investors may not be able to reinvest the redemption proceeds at a comparable return and/or at an effective interest rate as high as the interest rate or yield on the Securities being redeemed and may only be able to do so at a significantly lower rate. Investors in Securities should consider such reinvestment risk in light of other investments available at that time. • Investors will have no rights of ownership, including, without limitation, any voting rights, any rights to receive dividends
--	--	---

		<p>or other distributions or any other rights with respect to any underlying asset referenced by the Securities.</p> <ul style="list-style-type: none"> • Investors may be exposed to currency risks because the underlying asset(s) may be denominated in a currency other than the currency in which the Securities are denominated, or the Securities and/or underlying asset(s) may be denominated in currencies other than the currency of the country in which the investor is resident. The value of the Securities may therefore increase or decrease based on fluctuations in those currencies. • Investors should note that the Issuer will not be obliged to maintain the listing of the Securities in certain circumstances, such as a change in listing requirements. • The Issuer may apply any consequential postponement of, or any alternative provisions for, valuation of an underlying asset following certain disruption events in relation to such underlying asset, each of which may have an adverse effect on the value of and return on the Securities. • The amount(s) payable (or deliverable) on the Securities (whether at maturity or otherwise) will be based on the arithmetic average of the applicable values of the underlying asset(s) on the specified averaging dates. If the value of the underlying asset(s) dramatically surged on one or more of such averaging dates, the amount payable (or deliverable) may be significantly less than it would have been had the amount payable been linked only to the value of the underlying asset(s) on a single date. • If the basket constituents are highly correlated, any move in the performance of the basket constituents will exaggerate the impact on the value of and return on the Securities. Even in the case of a positive performance by one or more of the basket constituents, the performance of the basket as a whole may be negative if the performance of one or more of the other basket constituents is negative to a greater extent. • The performance of a fund is subject to many factors, including the fund strategies, underlying fund investments and the fund manager (such as the fund manager's performance in selecting and managing the relevant fund investments). A change in any such factors may adversely affect the performance of a fund and the value of and return on the Securities linked to such fund. • The Issuer may modify the terms and conditions of the Securities without the consent of Securityholders for the purposes of (a) curing any ambiguity or correcting or supplementing any provision if the Issuer determines it to be necessary or desirable, provided that such modification is not prejudicial to the interests of Securityholders, or (b) correcting a manifest error. • The Issuer may adjust the terms and conditions of the Securities without the consent of Securityholders following certain events affecting the Issuer's hedging arrangements
--	--	--

		<p>and/or the underlying asset(s).</p> <ul style="list-style-type: none"> In making discretionary determinations under the terms and conditions of the Securities, the Issuer and the calculation agent may take into account the impact on the relevant hedging arrangements. Such determinations could have a material adverse effect on the value of and return on the Securities. The Issuer may be substituted without the consent of Securityholders in favour of any affiliate of the Issuer or another company with which it consolidates or into which it merges or to which it sells or transfer all or substantially all of its property. The Issuer is subject to a number of conflicts of interest, including: (a) in making certain calculations and determinations, there may be a difference of interest between the investors and the Issuer, (b) in the ordinary course of its business the Issuer (or an affiliate) may effect transactions for its own account and may enter into hedging transactions with respect to the Securities or the related derivatives, which may affect the market price, liquidity or value of the Securities, and (c) the Issuer (or an affiliate) may have confidential information in relation to the underlying asset(s) or any derivative instruments referencing them which may be material to an investor, but which the Issuer is under no obligation (and may be subject to legal prohibition) to disclose. <p>Investors may lose up to all of their investment if one or more of the following occurs: (a) the Securities do not provide for scheduled repayment in full of the issue or purchase price at maturity or upon mandatory early redemption or optional early redemption of the Securities, (b) the Issuer fails and is unable to make payments owing under the Securities, (c) any adjustments are made to the terms and conditions of the Securities following certain events affecting the Issuer's hedging arrangements and/or the underlying asset(s), that result in the amount payable or shares delivered being reduced, or (d) investors sell their Securities prior to maturity in the secondary market at an amount that is less than the initial purchase price.</p>

E.3	Terms and conditions of the offer:	<p>An offer of the Securities will be made in Ireland during the period from, and including, 3 March 2016 to, and including, 5 p.m. (CET) on 4 May 2016 (the "Offer Period").
